

Profile Summary

Infrastructure Automation Engineer with 7+ years of IT experience and 5+ years in cloud and infrastructure automation using **Ansible** and **Terraform**. Specialized in building scalable automation frameworks and workflows, executed using **AWX**. Strong hands-on experience in **administering AWX**, managing job templates, projects, credentials, and resolving platform-level issues. Proven ability to integrate Ansible automation with cloud services, manage secrets with Vault, and support multi-environment automation strategies. Adept at troubleshooting playbook execution issues, AWX service failures, and maintaining high availability in AWX clusters.

Academic Details
